BioShield USA, Inc.

Our division responsible for all COFEPRIS registrations (Mexico).

About Previcare

Previcare is a healthcare company focused on the research, development, sales, and marketing of industry leading hand sanitizer and hard surface disinfectant products. With offices in Toronto (Ontario) and Buffalo (New York), Previcare serves wholesalers, and institutional clients, and government agencies throughout North America.

Previcare manages product families to serve the specific needs of its clients:

[AllDay](#) Hand Sanitizers are available through a number of pharmacies, general retailers, and warehouse clubs throughout North America. Products are available in both BZK and alcohol formulations and in spray, gel, and wipes formats. Sizes range from 10 mL pen sprays to one-gallon jugs and 265-gallon totes, depending on the sales channel. AllDay's patented, hypoallergenic formula kills 99.99% of tested germs in 15 seconds. Its skin barrier emollient technology, upon drying, creates a non-absorbing barrier that soothes, moisturizes, and protects your skin for up to 24 hours or 10 hand washings.

[GR-AD](#) Pro Hard Surface Disinfectants are primarily used by institutional clients in the healthcare and food industries. Concentrations and sizes vary by application and generally range from one-gallon jugs to 265-gallon totes.

[CAx](#) Disinfectants is Previcare's newest product family. Its proprietary formulation provides exceptional cleaning and disinfectant properties for both retail consumer and industrial/commercial applications.

Previcare's healthcare, commercial, and consumer-friendly products are EPA, FDA, and Health Canada registered.

THE PREVICARE ADVANTAGE

In our quest to provide the most effective and non-toxic protection for your family, Previcare has developed various proprietary sanitizer and disinfectant formulas. We use tried and trusted ingredients such as alcohol, BZK, and citric acid, but also include proprietary additives and unique processing to increase cleaning power and the length of time the formulas remain active on surfaces, including your skin – providing all day protection.

Alcohol

Alcohol-based sanitizer is the widely accepted preferred standard in the current battle against the coronavirus (COVID-19). Previcare offers an array of products at or above the 60% alcohol content minimum standard recommendation.

BZK

Benzalkonium Chloride (BZK) is a widely accepted active ingredient in hand sanitizers for use as a skin disinfectant, and as a first-aid antiseptic. BZK is known to be effective against viruses, fungi, and bacteria, and is preferred by some people as it does not harm, sting, or dry out skin like alcohol can.

Citric Acid

Citric acid kills bacteria, mold, and mildew, so it's great for general disinfecting and cleaning. It is used in many households cleaning products, including metal cleaners, oven cleaners, tub and tile cleaners, soap-scum removers, bathroom cleaners, dish soaps, laundry detergents, air fresheners, and window cleaners. Previcare takes all that one step further. Using a proprietary process, Previcare's CAx™ product provides a broader and more intensive kill of viruses.

Other additives

Previcare uses various other additives in our AllDay products that stay on your skin through multiple hand washings, providing longer-term protection than conventional hand sanitizers and disinfectants. For other specialty hand sanitizer products, Previcare also has formulas that include holy water and hyssop anointing oil.
