

PETROLYMPIC

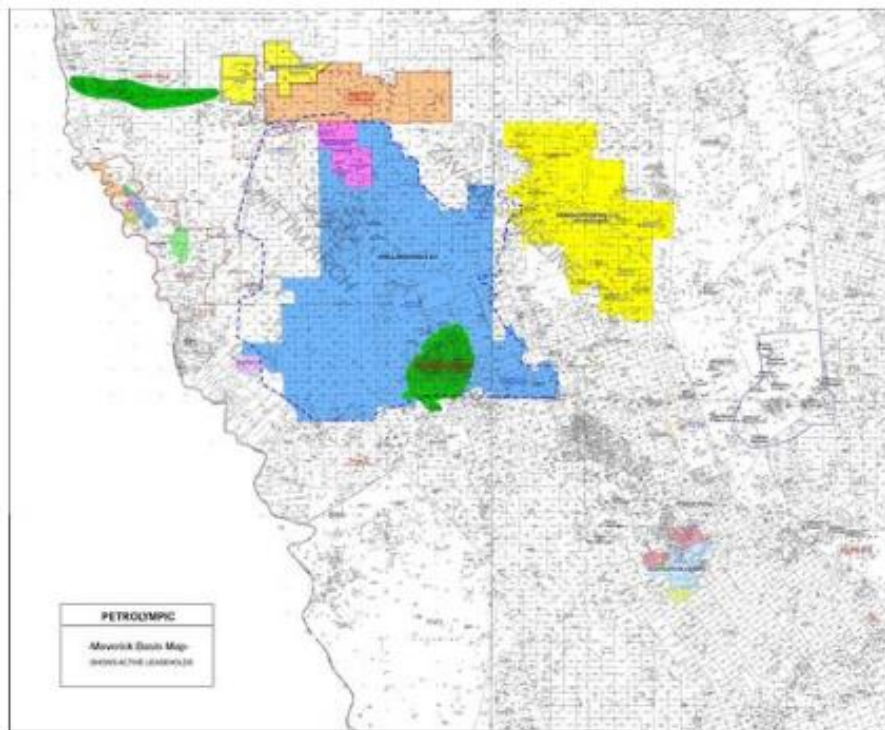

Maverick Basin Project, Texas, USA

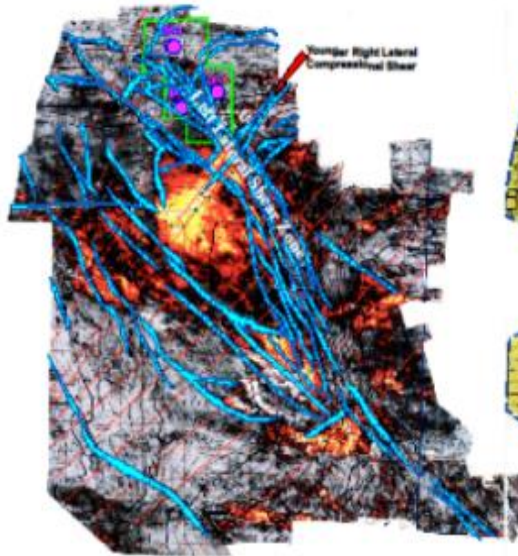

Target: Light Crude Oil

Total Land Package: 8,000+ acres

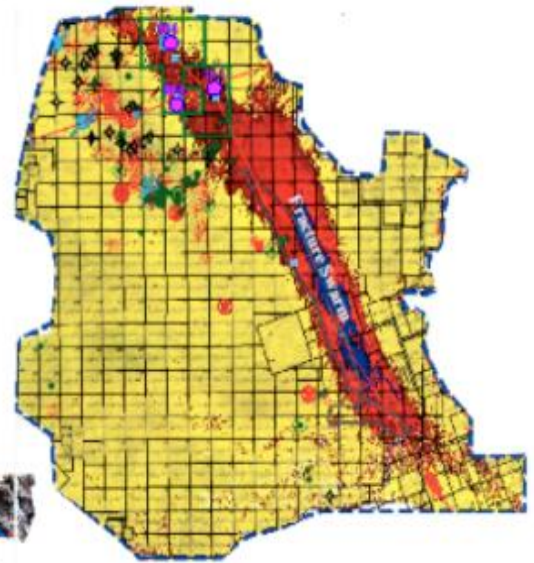

Highlights:

- The property is uniquely positioned within the preferred oil window of the prolific Eagleford Shale resource play and located among currently producing fields.
- The acreage also hosts other highly productive formations such as the Buda, Georgetown, Edwards and McKnight.
- The acreage is defined by 3D seismic and extensive offsetting well control.
- Several majors and large independent producers are currently active in this area.
- A large independent is sharing the lease line with the proposed acquisition and is currently developing the Georgetown.
